

Mr. Chandler,

As United States Citizenship, I would like to express my concern about less financial support for Video Relay Service. I strongly encourage you to maintain support deaf community for VRS. The reason is we need VRS in order to communicate effectively with hearing people. We want 24 hours and 7 days of the service.

My solution to you is to discuss with VRS businesses such as CSD, IP-Relay and Soreson before you cut financial supports to them. They are not ready for this. So, I believe it is best idea to discuss and help them to get funds from the states such as Maryland, California, New York and etc before you cut the funds.

Thank you for your reconsideration.
